VOL III — EDMONTON, ALBERTA, THURSDAY, SEPTEMBER 21, 1905 — No 213

A CANADIAN VESSEL

SEIZED BY THE JAPANESE

Canadian Barque Loaded with Salt Captured Early in August—Owners Protest

Ottawa, Sept. 20.—The owners in Victoria, B.C., of the barque Antiope, have wired the State Department asking it to intervene with the Japanese Government in their behalf. They state their vessel was seized by the Japanese on August 1st, while consigned to Nikolaivosk with a cargo of salf for fish-curing. She was taken to Sakhelien on a charge of carrying contraband food stuffs and taken to Hakodate for trial. The Secretary of State has reported the case to the British authorities. The owners protest that the vessel had no contraband.

TYPICAL MEXICAN ELECTION

Elpaso, Texas, Sept. 20.—A dispatch from Coasuila, Mexico, says "riots followed the Gubernatorial election. Several were killed in the Saltillo State capital. The report is reliable but no details have been received."

NEW ICE BREAKING DEVICE

Ottawa, Sept. 20.—Hon R. Prefontain left tonight for Cleveland to look over the device for ice breakng so that it may be used on the upper lakes to keep navigation open longer and permit as much as possible of the wheat crop being got out by steamers.

SOUTHERN CATTLE TRADE

Calgary, Sept. 19.—Live stock agent McMullen came in today after a busy season in the south and east range country moving live stock. He is very enthusiastic over the quality of the cattle moved and thinks if present indications continue September and October will be record breaking months for cattle shipments.

KILLED IN AN EXPLOSION

Kenora, Ont. Sept. 19.—This afternoon two men employed on the construction of the new Keewatin flour mills went into a shed seeking protection from blasting going on, but some uncovered powder near by exploded end blew off the back of Jos. Kennedy's head as a result of which he died shortly afterwards. The other man was not seriously hurt, escaping with scratches.

PRESDIENT BECOMES DICTATOR

Panama, Sept. 19.—Reports reached here today to the effect that General Rafael Reyes, President of Columbia has declared himself dictator and imprisened members of the Supreme court at Bozota. Mobs, angered by this action, attacked the president's palace and were fired on by troops who killed and wounded many of the rioters. Revolutions have been started in Antioquin and Santander.

B. C. RAILWAY MATTERS

Vancouver, B. C., Sept. 19.—John Hendry, President of the V.W. & Y. Ry., really a Canadian branch of the Great Northern, running between Vancouver, B.C. and Seattle returned from England today. He said, "all that prevented the road now from being built north to the G.T.P. was a bonus from the Provincial Government. He said it could be announced the G.N. would build west immediately from the Hope Mountains to Vancouver.

REDUCED FREIGHT RATES

The C. P. R. are putting in force a new schedule of freight rates to Edmonton on October 1. The rate from Montreal and Toronto to Edmonton has been reduced on first class freight from $3.46 per hundred to $2.97, on second class from $2.91 to $2.50, on third class from $2.36 to $2.03; on fourth class from $1.79 to $1.54, on fifth class from $158 to $1.36, on sixth class from $1.45 to $1.25.

RAILWAY PROGRESS

Divisional Engineer Burns, of the C.N.R., is in the city. The steel, he says, was within eight miles of Lavoies on Saturday last and will be within about eighty miles of the city now.

The track laying gangs will reach Fort Saskatchewan in about a month and it is expected they will not be delayed long by the bridge. The grading is all completed into this city. The ties are delivered along the grade joining the new station with the E. Y. and P. and as soon as the steel arrives the track will be laid.

POLITICAL

R. B. Bennett was billed to address a meeting Tuesday evening at Olds.

LAIRD RUNS IN REGINA.

Regina, Sept. 19.—Mayor Laird received the nomination at the Conservative convention here last night. Haultain was nominated, but his name was withdrawn. The balloting was close between Mr. Laird and Dr. Cowan. Laird is president of the Saskatchewan Conservative association.

DENIAL

The Albertan publishes the following telegram:

Edmonton, Sept. 19.

Calgary Albertan:

You may positively deny the statement that either myself or any member of my firm are solicitors for the Grand Trunk Pacific or Grand Trunk Railway.

C. W. CROSS.

ANOTHER BOOMERANG

The Calgary Herald publishes another attempted knock at Edmonton supposed to have been written from Red Deer and appearing over an irresponsible non-de-plume. Fortunately the Heralds belongs to the class of journals whose enmity is preferable to its friendship and the column and a half of scurrilous rubbish will serve the double purpose of advertising Edmonton and adding another to the steadily increasing list off misrepresensations which are destroying whatever reputation that journal may have ever had for reliality -or responsibility.

LABOR MEN CONVENE.

Toronto, Sept. 20.—The Trades and Labor Congress today held a busy session. The labor stand for the abolition of the Dominion Senate was changed to a demand that it be elected. The work of the Ontario labor bureau was approved. The congress went on record as in favor of the abolition of property qualification for voters in civic elections.

TEDDY AND LIANG TUNG.

Oyster Bay, Sept. 20.—Sir Cheng Tung Liang Tung, the Chinese minister, presented to President Roosevelt Wang Tsi Hsi, an attache of the Chinese foreign office, who came to this country several weeks ago as an envoy of the Chinese government to be present at the Portsmouth conference In the event that China's appeal for representation was granted. It was decided that no other countries except Russia and Japan should be represented at the conference, and Mr. Wang remained during the conference, with Sir Liang at Amherst, Mass.

Sir Liang and Mr. Wang remained with the president nearly an hour. Later, Sir. Liang chatted freely on several topics. He said their call was simply of respect.

"Mr. Wang did not come to this country to negotiate an exclusion treaty," said the minister, "and that subject was not even mentioned in our conversation with the President. In fact, there was no significance in our visit."

Sir Liang was asked about the recent purchase by the Chinese government of the Canton Hankow railway and its concessions. "This is purely a local Chinese enterprise," he responded.

"No, the Japanese have nothing whatever to do with it. The line is to be operated and extended by the people of the provinces through which eventually it will run. Foreign engineers will be employed to make the extensions, but they will be simply employees. Chinese will own and operate the road.

"There is really not the prejudice in China against railroads that is popularly supposed. Recently there has been a great awakening among the Chinese, and enterprises of various kinds are prosecuted successfully. All this of course is a matter of education. To advance the interests of education and to study methods a commission, consisting of a prince, a privy councillor, a governor of the provinces and an assistant treasurer has been appointed to visit Europe and America.

"The commission will make an exhaustive investigation, and its report will be made the basis of advanced action on the part of the government."

CAPTURED A CONVOY

AND MASSACRED THE ESCORT

The Whitbois Capture a German Military Convoy with large Quantities of Food, Arms and Amunition

Cape Town, Sept. 20.—The Witbois, in evading the sweeping columns of General Vontrotha commander in German south west Africa surprised a German convoy near Keetmann's kopje Namaqualand, assassinated its escort and captured thousands of cattle, 122 waggons, many rifles and a quantity of ammunition.

RUSSIAN PRISONERS RELEASED

Riga, Russsia, Sept. 20.—Central prison here was attacked early this morning by a crowd which scaled the walls, cut the telephone wires and killed -two guards and seriously wounded three. The mob forced the cells and liberated two important political prisoners.

NORWAY IS TURBULENT

Karlstadt, Sept. 19.—The Norwegian and Swedish delegates were in conference for two hours and a half today and adjourned to meet when an agreement is reached on certain points submitted to a sub-committee.

A certain element in Norway is opposing the proposed terms of agreement, thus placing difficulties in the way of the delegates. It is understood that as a basis of the agreement Sweden has promised to sign an arbitration treaty as soon as Norway is recognized as a separate state, while Nofway agrees to destroy all the new frontier fortifications. The other conditions are still under consideration.

The Norwegian premier, M. Michelsen, one of the commissioners, authorized the following statement: "Reports regarding mobilization in Norway are greatly exaggerated, and probably are circulated with the intention of creating a sensation. In any case, no more troops will be destined to the frontier while the conference is sitting."

GERMAN CONSULS HERE

The German consul for Canada, Mr. R. Franksen, of Montreal, and the Counsul for the Western provinces, Mr. W. Hespler, of Winnipeg, are in the city. They are making a tiour of Western Canada and have just returned from the coast. They came up to Edmonton to visit the German settlements in this vicinity and will drive out to Josephburg and Stony Plains.

Mr. Franksen is delighted with the prospects of the West. He says that everybody he meets is filled with hopes and expectations for great things in this vicinity and he thinks they have good grounds for the same. "What you need here," he said, "is more men." Mr. Franksen comes from Berlin Germany.

Mr. Hespeler is one of the old timers in the West, he came to Winnipeg in 1873 and was the means of establishing the Mennonite settlements in Manitoba. He was speaker in the Manitoba Legislature for one session. He has been German Consul in Winnipeg for twenty-three years and takes a deep interest in Western immigration. He says the general prosperity of the West this year is almost phenomenal and the result is going to greatly benefit Canada. He is looking forward with a good deal of interest to the visits today to the German settlements near this city.

CANDY

Conditions in the Yukon

Mining Development in the Golden North--A Land of Scenic Beauty--Transportation Facilities--Trade Conditions : : :

Hon. F. Oliver, accompanied by Mrs. Oliver returned on Monday's late train from the Yukon. Interviewed by the Bulletin regarding his impressions of the north country Mr. Oliver said:

"The Yukon is a country of magnificent distances and of equally magnificent possibilities—a country of marvellous beauty and with a wonderful distribution of mineral wealth. Although the cream has been taken from the gold mines of the Klondike to the extent of over $100,000,000 there is in the opinion of practical men on the ground, evidence of the existence of another $100,000,000 worth of gold within practically the same area readily available to scientific mining enterprise. The ground of this faith and the proof of this fact is seen on Bonanza creek where within a distance of ten miles there is now in operation plant of all kinds for working alluvial gold deposits to the value of over $1,000,000.

On other gold bearing creeks the work is being done with smaller and therefore less economical plants, but with improved means of communication resulting from the construction of the Klondike Mines Railway and the reduction in freight rates which must naturally follow, similarly extensive plants may be expected to be put in operation on all the other creeks. Ground which was at first worked over by individual miners with primitive and expensive methods is now being worked again with ample profit by more economical means.

"The output of gold is much smaller than in the early fat years but owing to new conditions of mining the lesser amount produces a greater amount of trade as shown by the customs returns. The volume of trade into the Yukon is larger than ever before although the output of gold will only be from $7,000,000 to $9,000,000 as compared with 23,000,000 in 1900. The value of the gold production to Canada is not so much in the amount of gold produced as in the trade which it creates. Therefore the $7,000,000 output this year is of more value to Canadian trade than the output of $23,000,000 in 1900. As large operations come into play on the various creeks this increase of trade will be proportionately greater.

"While the creek valleys have nearly all been mined over once, there still remains an immense amount of virgin ground at a higher level. A remarkable formation called the White Channel passes across the country from Bonanza and El Dorado to Hunker Creek, showing in the banks of the creek valleys and also in the intervening banks of the Klondike valley. Many millions have been taken out of this channel by individual miners and millions more are now being taken out by hydraulic process, in some cases working over the same hill that had been worked by individual miners. There still remains a very large part of the White Channel which has not yet been touched owing to the difficulty or the impossibility of getting water in such position as to work the hills by hydraulic process. The securing of water with which to work out the White Channel is one of the great problems of the country, and upon its success depends the future output of many millions of gold as surely existing as in the reefs of Johannesburg.

"Among the many processes for working out the creek valleys, the latest and most approved although at the same time the most expensive is the dredge, of which two are in operation, one on Discovery claim on Bonanza creek, that is to say the claim on which gold was first struck in the Klondike diggings, and the other at the mouth of Bear creek, a small gold bearing tributary of the Klondike river. In both cases the ground had been previously worked over. One great advantage of the dredge is that it can be worked with a comparatively small supply of water. Enough for it to float in enables it to operate successfully, scooping up the gravel, and at the same time washing it, the same water being used over and over again, while in the ordinary methods of sluicing, the water is only used once as it passes through the claim and if there is no flow there is no washing. Both the dredges now in operation work by electricity. The Bear Creek dredge is the larger and newer of the two and cost $250,000 before it began operations.

"Besides the Klondike diggings so-called, which include the Bonanza, El Dorada, Bear Creek, Hunker, Dominion, Sulphur, Quartz, Gold Bottom, Gold Run, and other tributary streams there are diggings on the upper waters of the Stewart river, on the head waters of the Sixty Mile creek, on the head waters of the Salmon and in the Lake Kluane district. Kluane is 150 miles west of White Horse, the Big Salmon about 100 east, Sixty Mile about sixty miles west of Dawson, and the Stewart river diggings about 150 miles south east. All these are gold producing on a considerable scale, but none have shown the richness and facilities for working that the Klondike diggings have. However, with cheapened and improved transportation and the application of improved methods there is no doubt that placer gold mining will be a flourishing and profitable industry in the Territory for many years to come.

"In the opinion of mining men the country in general has every appearance of being highly mineralized and in consequence great interest is taken in quartz development. A number of quartz claims are in process of development in the neighborhood of Dawson in particular. One large commercial company has made experimental shipments of ore from a mine which is being opened immediately opposite the town on the west bank of the Yukon river.

"In the immediate vicinity of White Horse there are indications of copper which have led to the staking of several groups of claims, and upward of $100,000 has been spent in development work, which so far has shown satisfactory results. But quartz mines can only be operated by cap-

Conditions in the Yukon

Continued from page two

ital and on a large scale and until capital is sufficiently interested nothing more than development work can be expected. The White Horse copper mines are within four miles of the railway and 110 miles from the sea at Skagway, so that they could scarcely be more favorably situated for successful operation in connection with the smelters on the coast of Vancouver Island and on Puget Sound.

"On the Windy Arm of Tagish Lake some 12 miles east of the railway at Cariboo Crossing, and accessible to the railway by steamboat, J. H. Conrad, formerly of Conrad Bros., Macleod, is actively developing a group of silver lead mines. Mr. Conrad has been engaged in mining operations for the past twenty years and is confident he has a very rich proposition in hand. His faith has been shown by his work. He has 150 men employed in development work, building a wharf and erecting a four mile aerial tram to convey ore from the mines to the navigable waters of Windy Arm. He expects to be shipping ore by October 1, as soon as the tram is completed. This is not more than 50 miles from the tide water at Skagway with downgrade nearly all the way. The White Pass Railway is preparing to run a spur to Windy Arm, so as to give the best possible shipping facilities.

"On the opposite side of the Windy Arm a rich strike of copper and gold was made a few days before my visit and Mr. Conrad intended to put a gang of men on to do development work at once.

"In a country of long winter and where mineral development so sorely needs both heat and power in immense quantities the question of coal supply is of first importance. Coal is mined some 30 miles north of Dawson on the banks of the Yukon river and is used to some extent by steamers and also for domestic purposes in Dawson. A mine is in operation at Tantalus a short distance above Five Finger rapids on the Yukon. Three of the steamers of the British Yukon Navigation Co. use this coal and others will use it as soon as the supply is sufficient. The coal seems to be of good quality, but is carelessly mined owing to the rush demand.

"Another coal mine was operated for some years, nearer the Five Finger rapids but became involved in litigation and was closed. It is now being re-opened and the proprietor hoped to soon have the coal on the market.

"A large deposit of excellent coal exists on the stage road between White Horse and Yukon crossing, and another in the Golden Horn Mountains some six miles west of the railway and fourteen miles northwest of White Horse.

"With the existence of coal demonstrated in such widely separated localities, it is fair to suppose the supply in the Yukon is abundant and that the present high cost of fuel and consequent great expense of mining by steam power as well as the cost of living will be reduced. The presence of coal of coking quality as some of the deposits are, also makes possible the establishment of smelters in the country itself as soon as the output warrants.

"In appearance the country is very beautiful. After the Coast Range has been passed it varies from undulating to rugged throughout. The sweep of hill and valley is on such immense scale and of variety such as to make a most charming scene. There is vegetation everywhere, except where occasionally the bare rocks are exposed. The growth is small and somewhat scattered, but shows no no other evidence of an unfavorable climate. The soil is chiefly clay from which the black mould has disappeared if it ever existed, except in low places. In consequence the country is not so favorable to agriculture as the first appearance would indicate. However, at White Horse, Selkirk and Dawson, and intermediate points along the river, the vegetables in the gardens would compare favorably with those in any ordinary agricultural country. There are a number of market gardens in the vicinity of Dawson, which produce potatoes, turnips, beets, carrots, cabbage and celery. The show of flowers in the garden plots was as fine as in Edmonton and the flowers of the same kinds.

"Grain and hay do not seem to be very successful, except in certain localities which shows that the fault is in the nature of the soil rather than in the climate. No effort has been made to grow any grain crop, but a small field of oats near Dawson was perfectly ripe, but the most of

The Balance Wheel

Look inside your watch a moment. The balance wheel is making 18,000 vibrations an hour, if its in good condition, It Will move 3,558 miles in a year and requires less than one tenth of a drop of oil to make it run. But if needs that little badly. Don't take chances, Let me clean and oil and put your watch in order for a year, it will pay you and satisfy you.

Free Gifts of Toilet Soaps

Use SUNLIGHT SOAP and SAVE THE COUPONS.

The Coupons are the same as cash because they can be exchanged for Toilet Soaps for which you have to pay out money every week.

Users of SUNLIGHT and CHEERFUL SOAPS can get their TOILET SOAPS for nothing.

Ask your grocer for particulars or write us for Premium List.

A gift is of little value if it consists of something you have no use for.

In exchange for Sunlight Soap Coupons you can get something you need and use every day.

REVILLON BROTHERS, LIMITED

TO DOMINION EXHIBITION

J. C. Porte leaves tomorrow for New Westminster in charge of an exhibit for the Dominion Exhibition to be held in that city from Sept. 27th to Oct. 7th. The exhibit is being prepared by the Board of Trade and will consist of grain, grasses and vegetables of all kinds, also manufactured articles such as butter tubs, woollen goods, brick, tile and flour, all produced in Edmonton and, fast but not least, three of Thos. Daly's apples grown in Alberta.

The exhibit will be shipped in a refrigerator car which will be attached to the express train tomorrow morning and be taken right through to the coast at once.

Harry Wilson is going to accompany Mr. Porte, he having charge of a similar exhibit for the Strathcona board of trade. Both exhibits are good ones and will make an excellent advertisement for central Alberta at the Dominion Exhibition.

POTTER & McDOUGALL

Conditions in the Yukon

Continued From Page Three.

the fields seemed very late and the crops light as well. This, however, would no doubt be changed by continuous cultivation.

"Cattle and sheep brought in for meat graze to good advantage during the summer, although the growth of grass is limited, small brush displacing it to a great extent. Wild roses are very numerous in season and raspberries, cranberries and huckleberries grow wild in large quantities.

"In the southern part between Selkirk and White horse, the ground is free from frost in the summer time but from Selkirk north the frost is eternal at a depth varying from a few inches to a couple of feet. Cultivation tends to thaw out the ground and no doubt the longer continued and deeper the cultivation, the warmer the soil would be and the better the growth.

"The country at large is comparatively easy to travel through, owing to the nature of the ground and the smallness of the timber and vegetable growth. Roads are easily made though not natural as on the prairies and easily maintained, notwithstanding the heavy traffic up the creeks from Dawson. The winter stage road from Dawson to White Horse, 380 miles, is operated on wheels in the beginning and end of winter. The winter trip from Dawson to White Horse occupies five days and the stage service is said to be equal to anything which is now, or ever has been in America.

"Of course where distances are so great the transportation question is all importance. The transportation facilities to Dawson are excellent. Three lines of steamers run regularly during the summer from Seattle and Vancouver to Skagway by way of an almost entirely land locked passage. The trip occupies from three to four days and cannot be equalled for scenic attractions and comfort, owing to the calm waters, by any other ocean trip in the world. From Skagway to White Horse, 110 miles, the White Pass railway runs a train each way every day but Sunday, leaving Skagway at 9 a.m. and reaching White Horse at 4 p.m. For the first twenty miles the line climbs to the summit of the White Pass and on this section of the line are examples of engineering achievement not excelled on the continent and the thrills available to the passengers are all that can be asked for.

"Between White Horse and Dawson the British Yukon Navigation Co., a subsidiary company to the W.P.R.R. operate a line of seven or eight freight and passenger steamers. The trip down the river occupies from one and a half to three days and the return trip up stream four days. The trip from Vancouver to Dawson can be made in from 6 to 10 days according to circumstances and connections.

"From St. Michael's at the mouth of the Yukon River two large trading and transportation companies operate two lines of large river steamers to Dawson. While the facilities are excellent, the rates as yet are very high and to a certain extent prohibitive of greater expansion in mining enterprise, but with the permanence of the country assured the rates no doubt will be reduced from time to time.

"Although the population of the Yukon, which is chiefly that of Dawson City and the Klondike diggings, is not nearly so great as a few years since, there is still a great deal of very satisfactory business prosperity. The discoveries at Nome and at Fairbanks on the Tanunah have drawn away many of those who took part in the first rush to Dawson and as those camps have now become permanent gold producers on a large scale there is necessarily considerable fluctuation in the population as reports are favorable or unfavorable.

"With gold output of $7,000,000 and a population of say 10,000 the Yukon has probably more money to divide among its residents than any other locality in the known world at the present time and as the output is not likely to decrease materially for many years, everything points to the maintainence in the Yukon of a prosperous and progressive community whose trade is of the highest importance to the Dominion at large. At first the trade from the Yukon was chiefly with the United States but from year to year that condition has changed until now fully 75 per cent is from Canada. This per centage might still be increased and undoubtedly will be as Canadian producers and shippers adapt themselves to the special requirements of the Yukon trade. With freight rates varying from $40 to $75 per ton from Vancouver to Dawson the quality at landing is everything. The original price is the least consideration. If Canadian shippers dealing with the Yukon will bear this in mind they will get a continually increasing per centage of that trade."

THE BIG STORE

Just Received a New Stock of Dr Jaegers

PURE WOOL CLOTHING

For Men, Women and Children.

Having accepted the agency for this district for Dr. Jaeger's Sanitary Woollen System Co., Ltd., we can furnish you with their printed and illustrated catalogues and any goods you may desire that are described therein at the regular prices.

A CALGARY SUICIDE

MAN DRANK STRYCHNINE

Henry Wilcox a Plumber Takes His Life in the Palace Hotel

Calgary, Sept. 19.—Henry Wilcox, a plumber or tinsmith by trade, and well known in the city, walked into the Palace hotel about half past five yesterday afternoon and swallowed the contents of a one-eighth oz. bottle of strychnine, and died about two hours later, just as he was being carried into the Holy Cross Hospital.

Wilcox was a man about forty years of age, of muscular build, with a light, sandy moustache. When he walked into the hotel yesterday he sat down in a chair in the sitting room. After being there for a while he complained of feeling ill and asked for a glass of whisky. This was given to him and shortly after he asked for water, which was also brought to him. At this time he told a companion that he had swallowed some poison, but those present thought it was merely drunken talk.

About half past six he became so evidently ill one of the proprietors, Mr. Stephens, sent out for Dr. Crawford, and when the physician arrived he saw at once that Wilcox's story was true, and that it was really a case of strychnine poisoning. Antidotes were at once given and Shaver's ambulance was called and the would-be suicide taken to the Holy Cross Hospital. Assistance was called too late, however, for Wilcox died just as he was being carried into the hospital.

A small half-ounce bottle bearing the label of Powers & Weightman, a firm of Philadelphia druggists, which had contained one-eighth oz. of strychnine crystals was found under the chair in which Wilcox had been sitting, and confirmed the story as to the poisoning.

It is not known how the unfortunate man got the strychnine. He must have had it in his possession some time, as the proprietor of the Palace hotel stated that he had noticed Wilcox around his place at frequent intervals during the past six months and did not think he had been out of the country during that time. A reporter inquired as to the purchase of strychnine at the different drug stores of the city last night, but none had sold the poison to Wilcox.

The suicide has been living in the north-eastern portion of the city but just where could not be learned last night. Yesterday morning he asked for a room at the Palace hotel, saying he would like to live up town nearer his work, but as they had no vacant rooms, he could not be accommodated.

Coroner Sanson, who was notified of the death of Wilcox, ordered the body taken to Shaker's undertaking parlors, and later stated that he did not think an inquest would be necessary.

TELEGRAPHIC

MANUFACTURERS MEET

Quebec, Sept. 20.—At the afternoon session of the Canadian Manufacturers' Association meeting, C. C. Ballantyne, of Montreal, was elected president, and H. Cockshutt, of Brantford, vice president. Winnipeg was chosen as the next place of meeting and the association will therefore hold their convention at the prairie gateway in 1906.

PONOKA CONSERVATIVES NOMINATE

Ponoka, Sept. 18.—The Conservatives of Ponoka field their convention to select a candidate for the provincial legislature today.

A large number turned out and the proceedings were marked with unanimity. R. B. Bennett was present and made a few remarks at the outset. When it came to the vote J. A. Jackson, advocate, was found to have a majority over A. C. Hare.

THE EIGHT HOUR DAY.

Indianapolis, Sept. 20.—At the headquarters of the International Typographical Union this statement was issued: "Strikes for the eight hour day are on in thirty-three cities, and in most of these many of the employing printers have signed. In 216 cities we have the eight hour day, or to become effective on January 1; in 56 of these cities where strikes have been declared or threatened, all offices where union men had been employed have signed the new contract.

A FATAL ERROR.

Toronto, Sept. 20.—An error in distinguishing between mushrooms and toad-stools has had unfortunate results in a Toronto Junction household. The family of Andrew Goulding of Murray avenue, gathered on Saturday what they took to be edible mushrooms, but which have since proved to be a poisonous variety. On Sunday the family partook of them, and on Monday became ill and a doctor was called. On Tuesday the whole family were extremely ill and yesterday a nephew who was visiting at Goulding's died. Mr. Goulding and one of his sons are still in a precarious condition, but Mrs. Goulding and the rest of the family are improving.

RUSSIA BLOCKED THE CONFERENCE.

Washington, Sept. 19.—Regarding the St. Petersburg reports as to the possible re-convening of the Hague peace conference it is assumed here that the Russian Government, which caused the postponement of the second conference on account of the war with Japan is now about to remove the obstacle and notify the administrative council that it is willing to proceed with the second conference.

LABOR CANDIDATE

Albertan: There is a strong probability that the labor party will put an independent candidate in the field in Calgary. The carpenters have taken the initiative and many other members of the different unions are keen to endorse the action that has already been taken by the carpenters. A meeting of the Trades and Labor Council will be held on Thursday night when the question will be taken up and carefully considered and action taken upon the suggestion. The names of Ald. Brocklebank and Mr. McIntosh, of the carpenter's union are mentioned in connection with the independent nomination.

LOCAL

—The Maroons were defeated by Calgary yesterday 6 to 3.

—The "Richest Coon in Georgia" will be put on in the rink on Saturday and Monday evenings.

—On Sunday next Clarke's orchestra will give a free sacred concert in the rink at 8.45 p.m. Doors open at 8 p.m. A silver collection will be taken up to defray expenses.

—A gang of men are at work on the cement side walks on the west side of First street north of Jasper avenue. The work was delayed for a short time for lack of cement, but is now under way again.

—Regina, Sept. 19.—Before the transportation commission Mayor Laird recommended that an inspector be stationed at Calgary to inspect the wheat of the new provinces shipped to British Columbia.

—Strathcona fair opened today. The exhibits are being arranged and preparations made for tomorrow which is the principle day of the exhibition. This is a very busy time with the farmers but a good attendance is expected tomorrow.

—Premier Rutherford is more than a lawyer, he is a farmer also. The threshing machine was busy on his farm this week and his grain is turning out well, both as to yield and sample. The Premier had about 200 acres of crop this year.

—Chief Architect Ewart of the Public Works Department, Ottawa, is in the city. He inspected the work on the epnitentiary, under erection, today and found everything satisfactory. He is anxious to have the work proceed as rapidly as possible so that the building may be ready for occupation at an early date.

—C. W. Sutter of the immigration department, returned last night from Leduc. He says that threshing operations will begin there in a few days. The crop is a record one and every farmer claims to have a better yield than his neighbor. He drove out three miles from Leduc. He says there was a shortage of farm laborers in that vicinity and that it is difficult now to get men to thresh.

—Instructions have been issued by the Attorney-General's department here for the extradition of A. Levesque, formerly of Calgary, who is charged with forging a check for $150 which was cashed by the Hudson's Bay Company in Calgary. Levesque has been located in Minneapolis and will be apprehended at once. He will be brought back to Calgary for trial.

—The Attorney General has received a communication from the Post Office Department at Ottawa regarding the sale of and transmission through the mail of vulgar and indecent post cards. The Post Office Department is taking what means it can to prevent their transmission through the mails and suggests that the Attorney Generals in the different provinces might take legal proceedings to prevent the sale of these cards.

—Joseph Wilson of Walker's Flat was threshing yesterday. His grain is turning out well. They threshed 1,000 bushels of oats yesterday in a short time. The grain is an excellent sample and is turning out about 80 bushels to the acre. His spring wheat is yielding about 35 bushels to the acre and his fall wheat about the same. The fall wheat tested 65 lbs to the bushel. The straw is in splendid condition for threshing.

PERSONAL

Ald. May went south today.

Hon. Senator La Rue of Quebec is in the city.

J. McGeorge and F. F. Tims, visited the Fort on Tuesday.

G. Robertson and Mrs. Robertson of Vegreville are in town.

Mrs. P. Connors, Mrs. J. W. Shera and Mrs. E. Looby returned from Banff yesterday.

D. Grant assistant district organizer C.O.F. for B.C., Alberta and Saskatchewan is in town.

M. Anderson and wife returned to Winnipeg today after spending some time in town.

—Ottawa, Sept. 19—Mr. Morse of the Grand Trunk Pacific, says that the G.T.P. will erect a large hotel at Edmonton.

NEW SETTLERS' STORIES

Ben. F. Bilter, of Indiana, one of the agricultural editors who recently made the trip through Western Canada, writes thus:

George I. Cox, who lives at Ponoka, Alberta, moved into western Canada from South Dakota in 1899. He took his first crop in 1900, and has had good crops every year since, including oats, barley, flax, winter and spring wheat, rye, potatoes, turnips and all kinds of garden truck. "We are growing," he said, "larger crops on land that is selling for $7 to $15 per acre here than can be grown in Iowa or Minnesota on land that is selling for $60 to $100 per acre. Cattle, horses, hogs and sheep do well here. There is plenty of good native grass, and we can grow timothy, brome and clover." Mr. Cox now owns over 1,200 acres of land.

About twenty years ago Frank Cherry moved to Prince Albert, Saskatchewan, from Grand Rapids, Michigan. A year after his arrival, he was $170 in debt. Now he owns 320 acres of land, 80 head of cattle, 7 horses, together with farm house, stables, barns and granery; all free of debt. He says that his crop has averaged 25 bushels to the acre since he started. The lowest was 17 1-2 bushels, the largest 43 bushels. The smallest crop of oats in his experience was 40 bushels in 1904. The largest oat crop in Mr. Cox's experience, was in 1900, when he took 80 bushels to the acre.

Out in Alberta there are thousands of well satisfied, prosperous farmers, who came from the United States; one of them is Thomas Fuqua, who resides sixteen miles east of High River. In 1901 Mr. Fuqua sold out his land in Dodge county, Nebraska, for $72 an acre for 40 acres and $50 an acre for pasture land. He purchased a quarter section of land near High River for $3.75 an acre. It was raw, unimproved land. Mr. Fuqua has had great success raising winter wheat. The first year he took 770 bushels of winter wheat off of 35 acres. In 1903 he built a large house and two barns, and put in 160 acres of winter wheat, from which he harvested 4,160 bushels.

These instances of successes have been taken at random from the whole of the agricultural country of western Canada. They can easily be duplicated in southwest Manitoba and southeastern Assiniboia. In the Regina and Moose Jaw districts; in Assiniboia, along the Soo line in the same district, at various points along the Prince Albert line, and in all parts of Alberta.

And now, to put the climax to the story of Western Canada's progress and success, comes a bumper crop. Conservative observers predict that Western Canada will this year produce 100,000,000 bushels of wheat besides bountiful crops of other cereals and vegetables. There are fields in southeastern Assiniboia that will give 45 bushels of No. 1 hard spring wheat to the acre and the same is doubtless true of practically every district in western Canada, so an average of 25 bushels to the acre, which, on an acreage of 4,000,000 acres, is required to produce the longed-for 100,000,000 crop, does not seem by any means impossible. This is especially true when it is recalled that within the last twenty years there have been a number of years in which wheat averaged better than 25 bushels in this fertile country. With a 100,000,000 bushel crop Western Canada will be fairly swamped with prosperity, and in consequence the large immigration of this year from the states will, in all probability, be vastly exceeded next year.

With this perspective view of the prosperous conditions of Western Canada but briefly given, we invite our readers to go with us next week on our trip of over 4,000 miles, while we point out to them some of the things seen and enjoyed en route.
